

# Easy relay/timer control and remote monitoring

Ver.UP!

New functions are applicable only to base module FS05 or later and WindLGC Ver. 8.2 or later.

### Remote Monitoring

- Remote monitoring via PCs and smart devices
- FL1F WEB EDITOR enables easy design of web browser screen

### FL1F Access Tool

- Microsoft Excel add-in-tool available
- Ideal for managing periodic performance such as real time status monitoring and daily reports

### Reduces Development Time

- With 2 new additional function blocks (Float to integer conversion), a total of 46 types are available
- Supports user-defined function blocks

### High Expandability

- Text display
- 6 types of I/O expansion modules
- Connects to peripheral equipment using Modbus TCP communication (server/client, 16 connections)
- Up to 16 connections are enabled with 1:n communication

### High Maintainability

- Supports micro SD memory card
- Clock backup for 20 days
- New auto clock adjust function via NTP
- Simulation functions and online testing capabilities

### Easy Operation

- Small LCD display and control switches

### Easy-to-See LED Display

- Backlight in 3 colors (white, amber, red)
- Message display

### Multiple Variations

- 100 to 240V AC/DC, 24V DC
- 24V AC/DC, 12/24V DC
- Basic model without LCD display available

### High environmental resistance

- Operating Temperature -25 to +55°C (no freezing)

## Versatile FL1F to simplify wiring, adjustments, and settings of systems.

Change your complicated system of multiple relays, timers, and counters to a single IDEC SmartRelay.

The IDEC SmartRelay replaces many functions of peripheral equipment of the programmable logic controller. Features 10A max. output contacts and up to 192 display characters.

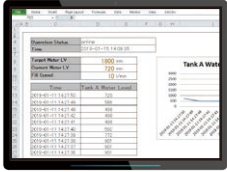

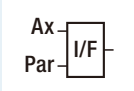

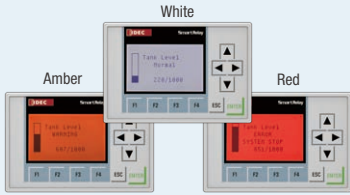

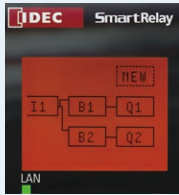

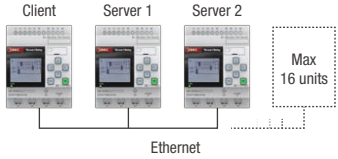

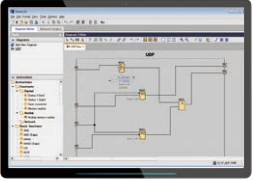

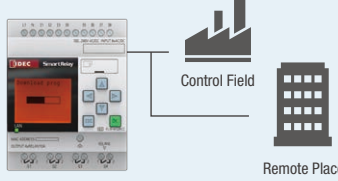

46 different types of function blocks make it possible to perform various control operations easily.

# IDEC SmartRelay is More Convenient Than Ever Before

New functions are applicable only to base module FS05 or later and WindLGC Ver. 8.2 or later.

<h3>Operation Management <span style="background-color: #FFD700; border-radius: 50%; padding: 2px;">NEW</span></h3> <p>New add-in-tool available for Microsoft Excel. Easy operation control using accustomed Microsoft Excel functionality. Useful for managing technical documents using tables and graphs.</p> 	<h3>Capable of Handling Various Scenarios <span style="background-color: #FFD700; border-radius: 50%; padding: 2px;">NEW</span></h3> <p>Analog values can be presented not only in integers but also floating points.</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  <p>Float to integer conversion</p> </div> <div style="text-align: center;">  <p>Integer to float conversion</p> </div> </div>	<h3>Remote Monitoring <span style="background-color: #FFD700; border-radius: 50%; padding: 2px;">NEW</span></h3> <p>New FL1F WEB EDITOR enables easy design of an user-friendly web page. The graphical display achieves intuitive operation and management.</p> 
<h3>Reports the Status by 3-color Backlight</h3> <p>Errors and alarms can be displayed with a choice of white, amber, and red backlighting, according to the status level.</p> 	<h3>Reports by Messages</h3> <p>Using a scroll function, a maximum of 192 one-byte characters (6 lines, 16 characters) in the Base Module, and a maximum of 240 one-byte characters (6 lines, 20 characters) in the Text Display, can be displayed.</p> 	<h3>Settings can be Modified On-Site</h3> <p>Using the LCD display and control switches, parameters can be changed and programs can be added on-site.</p> 
<h3>FL1F Communication</h3> <p>Data communication systems between IDEC SmartRelays can be easily established without any communication programs. 1:n communication with a maximum of 16 connections is available.</p> 	<h3>Batch Control through the Display</h3> <p>Settings of the base module of multiple units can be controlled and updated on a Text Display. Under the administrator mode, user programs can be easily modified.</p> 	<h3>Expandability for Easy Design Changes</h3> <p>I/O for a maximum of 60 points, 12 units can be expanded (maximum configurations are DI24 / DO20 / AI8 / AO8), enabling design changes easy to handle.</p> 
<h3>Reduces Development Time (1)</h3> <p>WindLGC, application software for IDEC SmartRelay, is capable of developing 3 programs at the same time.</p> 	<h3>Reduces Development Time (2)</h3> <p>Equipped with the user-defined function blocks, set control patterns can be made into blocks for repetitive uses.</p> 	<h3>Reduces Maintenance Time</h3> <p>Uploading and downloading of programs can be remotely controlled through Ethernet.</p> 

Product details, documents, and sample program available on website.

# FL1F IDEC SmartRelay

## New IDEC SmartRelay FL1F enhances both high performance and easy control.

- Maximum I/O 60 points: (24DI + 20DO + 8AI + 8AO)
- Maximum programming capacity: 8,500 bytes (400 function blocks)
- Operating temperature: -20 to +50°C (\*1) (\*2)
- For Base Modules with LCD display, not only program editing and monitoring of function blocks, but also addition and deletion of programs can be performed. The user interface enables intuitive operation. Programs can be modified quickly.
- For Base Modules with LCD display, a backlight display with 3 colors (white, amber, red), which can display 16 characters x 6 lines, is available (2-byte characters also available).
- Data is stored in a non-volatile memory, which provides no limit in backup time.
- With a built-in clock function, a maximum of 20-day backup is possible (at ambient temperature of 25°C.) Also, NTP function adjusts the clock automatically when connected to the internet.
- Equipped with a micro SD memory card slot, program downloading and data logging is possible using a commercially-available memory card.
- Ethernet communication port (RJ45). No cables required for downloading and uploading user programs. Also, Modbus TCP (server / client / 16 connection) for communicating with peripheral equipment is available. (\*1)
- Web server function available. "FL1F WEB EDITOR" function in WindLGC enables easy and expressive design of web pages by drag and drop.
- With 1:n communication, a system with a maximum of 16 connections can be built.
- New function block available (float to integer, integer to float conversion function block.) (\*1)
- "FL1F Access Tool" enables easy operation control using accustomed Microsoft Excel functionality. (\*1) (\*3)
- The Text Display for FL1F is a backlight LCD display (160 x 96 dots) available in 3 colors (white, amber, and red). Display of up to 20 characters x 6 lines. Scrolling, blinking, and bar graph available.
- Five new function blocks available (astronomical clock, analog filter, maximum and minimum, average, stop watch).

\*1) When FS is 05 or later. WindLGC Ver. 8.2 or later is required for FS 05 or later. \*2) When FS is 04 or earlier: 0 to +55°C \*3) Microsoft Excel Version 2010, 2013

### Base Modules

Package Quantity: 1

Rated Power Voltage	Input Signal	Output Signal	Display	Clock	I/O Points	Weight (approx.)	Part No.
24V DC	DC (*1)	Transistor	Yes	Yes	8/4 points	195g	FL1F-H12SCD
12/24V DC	I1, I2, I7 and I8 are used for digital/analog inputs	Relay	Yes	Yes	8/4 points	240g	FL1F-H12RCE
		—	—	—	—	200g	FL1F-B12RCE
24V AC/DC	AC/DC (*1)	Relay	Yes	Yes	8/4 points	240g	FL1F-H12RCA
		—	—	—	—	200g	FL1F-B12RCA
100 to 240V AC/DC	AC/DC	Relay	Yes	Yes	8/4 points	240g	FL1F-H12RCC
		—	—	—	—	200g	FL1F-B12RCC

\*1) With NPN/PNP sensor input. For details, see "Input Internal Circuits" on page 5.

### Expansion I/O Modules (\*2) (\*3)

Package Quantity: 1

Type	Rated Power Voltage	Input Signal	Output Signal	I/O Points	Weight (approx.)	Part No.
Input/Output	24V DC	DC	Transistor	4/4 points	95g	FL1F-M08B1S2
	12/24VDC	DC	Relay	4/4 points	130g	FL1F-M08B2R2
	24V AC/DC	AC/DC (*4)	Relay	4/4 points	130g	FL1F-M08D2R2
	100 to 240V AC/DC	AC/DC	Relay	4/4 points	130g	FL1F-M08C2R2
Analog Input	12/24V DC	Analog	—	2/0 points	95g	FL1F-J2B2
Analog Output	24V DC	—	Analog	0/2 points	95g	FL1F-K2BM2

\*2) I/O points within the range of the maximum expansion I/O points can be used.

\*3) When using modules of the same power voltage, supply power to the Base Module and Expansion I/O Modules using one power supply.

When power is supplied to the modules from different power supplies, the fast transient burst is 1 kV (IEC61000-4-4).

\*4) With NPN/PNP sensor input. For details, see "Input Internal Circuits" on page 5.

### Text Display for FL1F

Package Quantity: 1

Rated Power Voltage	Weight (approx.)	Part No.	Remarks
24V AC/DC 12V DC	220g	FL1F-RD1	Supplied with a mounting clip and gasket

### Options

Name	Part No.	Ordering No.	Package Quantity	Remarks
Application Software: WindLGC (*5)	FL9Y-LP1CDW	FL9Y-LP1CDW	1	DVD-ROM (incl. online help manual)
Mounting Clip for Base Module (*6)	FL1F-PSP1	FL1F-PSP1PN05	5	Supplied with a module
Mounting Clip and Waterproof Gasket for Text Display (*7)	FL1F-KW1	FL1F-KW1	1	Supplied with Text Display
IDEC SmartRelay User's Manual (English)	FL9Y-B1789	FL9Y-B1789	1	Downloadable from: <a href="http://www.idec.com/download">http://www.idec.com/download</a>

\*5) DVD-ROM (Including online help manual)

\*6) Supplied with a Base Module and an Expansion I/O Module.

\*7) Supplied with a Text Display, it includes a gasket, four mounting clips, and a power supply connector.

### Text Display Specifications

Power Voltage	24V AC/DC 12V DC
Allowable Voltage Range	20.4 to 26.4V AC 10.2 to 28.8V DC
Allowable Voltage Frequency	47 to 63Hz
Power Consumption	12V DC: 150 mA (Typ.) 24V DC: 75 mA (Typ.) 24V AC: 145 mA (Typ.) (*1)
Data Transmission Rate	10/100 M full/half duplex data transmission rate
Display	FSTN graphic display (W × H: 160 × 96 dots) LED backlight (White, Amber, Red)
Font type	English, Spanish, Russian, Chinese, Italian, Turkish, German, Dutch, French, Japanese
Displayable string	1 screen 6 lines × 20 columns
Keyboard	Membrane keypad
Installation	Panel cut-out using mounting clips
Dimensions (W × H × D)	128.2 × 86 × 38.7 mm

\*1) 75 mA when FS is 03

### LCD Display / Backlight

Backlight Durability (*1)	20,000 hours
LCD Display Durability (*2)	50,000 hours

\*1) Backlight durability is the number of hours taken for the light to become 50% of the original brightness.

\*2) Display durability is calculated under ordinary operating and storage conditions: room temperature, normal humidity below 65% RH, and not subjected to direct sunlight.

### General Specifications

Item	Specifications	Standard
Operating Temperature	Horizontal Mounting	-20 to +55°C (no freezing) (*1)
	Vertical Mounting	-20 to +55°C (no freezing) (*1)
Storage/Transportation Temperature	-40 to +70°C (no freezing)	—
Relative Humidity	10 to 95% (no condensation)	IEC60068-2-30
Atmospheric Pressure	795 to 1080 hPa	—
Operating Condition	No corrosive gas	—
Degree of Protection	IP20	—
Vibration Resistance	5 to 8.4 Hz, amplitude 3.5 mm 8.4 to 150 Hz, acceleration 9.8 m/s <sup>2</sup>	IEC60068-2-6
Shock Resistance	147 m/s <sup>2</sup>	IEC60068-2-27
Drop Test (packaged)	0.3m	IEC60068-2-32
Emissions	Limit class B Group 1 Conducted: 0.15 to 30MHz	EN55011/A EN55022/B EN50081-1
Electrostatic Discharge Immunity	8 kV air discharge 6 kV contact discharge	IEC61000-4-2
Radiation Field Immunity	Field Strength: 1 V/m and 10 V/m	IEC61000-4-3
Fast Transient Burst	2 kV (power line) 2 kV (I/O signal line)	IEC61000-4-4
Surge Immunity (*2)	1 kV (power line) normal 2 kV (power line) common (FL1F-H12RCC, FL1F-B12RCC only)	IEC61000-4-5
Communication Cable	2.5 mm <sup>2</sup> (one wire) 1.5 mm <sup>2</sup> (two wires)	—
Terminal Style	Finger-safe type (*3)	—

\*1) Base module: 0 to 55°C when FS is 04 or earlier  
Text display: 0 to 55°C when FS is 03 or earlier

\*2) For protection against surge noise on DC power supply types (FL1F-H12RCE/B12RCE, FL1F-H12SCD, FL1F-H12RCA/B12RCA), use surge absorbers, noise cut transformers, or noise filters. Use of a surge protection device (DEHN + SÖHNE GmbH + Co, BVT AD 24 Part No. 918 402) is recommended.

\*3) Tightening torque 0.5 to 0.6 N·m

## Input Internal Circuits

### DC Input

FL1F-H12SCD/-H12RCE /-B12RCE

FL1F-M08B1S2/-M08B2R2

When using a NPN output sensor, connect an external resistor (I3 to I6):

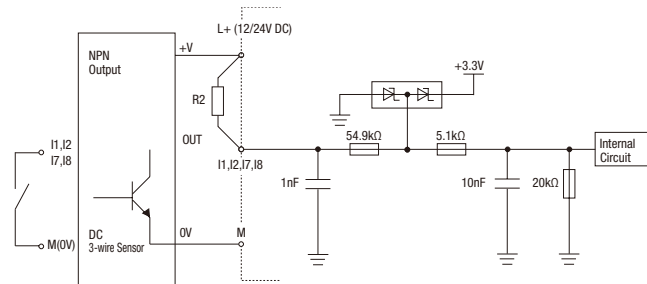

FL1F-H12SCD:

For power voltage 24V DC:  $R1 \leq 4k\Omega$ , 1/4W

FL1F-H12RCE, -B12RCE

For power voltage 24V DC:  $R1 \leq 8.1k\Omega$ , 1/4W

For power voltage 12V DC:  $R1 \leq 1.5k\Omega$ , 1/4W

I1, I2, I7 and I8 accept both digital and analog inputs.

The diagram above is for using I1, I2, I7, and I8 as digital inputs.

When using a NPN output sensor, connect an external resistor (I1, I2, I7, I8):

FL1F-H12SCD:

For power voltage 24V DC:  $R2 \leq 50k\Omega$ , 1/8W

FL1F-H12RCE, -B12RCE

For power voltage 24V DC:  $R2 \leq 100k\Omega$ , 1/8W

For power voltage 12V DC:  $R2 \leq 19k\Omega$ , 1/8W

### 24V AC/DC Input

FL1F-H12RCA /-B12RCA

FL1F-M08D2R2

Bleeder resistance (R3) calculation

R3 must satisfy the following three conditions.

Condition 1:  $R3 (\Omega) \leq \frac{\text{Maximum input OFF voltage} (= 5VAC)}{\text{Maximum sensor leakage current (A)}}$

Condition 2:  $R3 (\Omega) \leq \frac{\text{Sensor power voltage (V)}}{\text{Maximum sensor load current (A)}}$

The voltage drop across the load (R3) must be less than 5V while the sensor is turned off.

Condition 3:  $P_{R3} (W) \leq \frac{(\text{Sensor power voltage (V)})^2}{R3 \text{ resistance} (\Omega)} \times 3$  (3: recommended allowance)

### 100 to 240V AC/DC

FL1F-H12RCC /-B12RCC

FL1F-M08C2R2

Bleeder resistance (R4) calculation

R4 must satisfy the following three conditions.

Condition 1:  $R4 (\Omega) \leq \frac{\text{Maximum input OFF voltage} (= 40VAC)}{\text{Maximum sensor leakage current (A)}}$

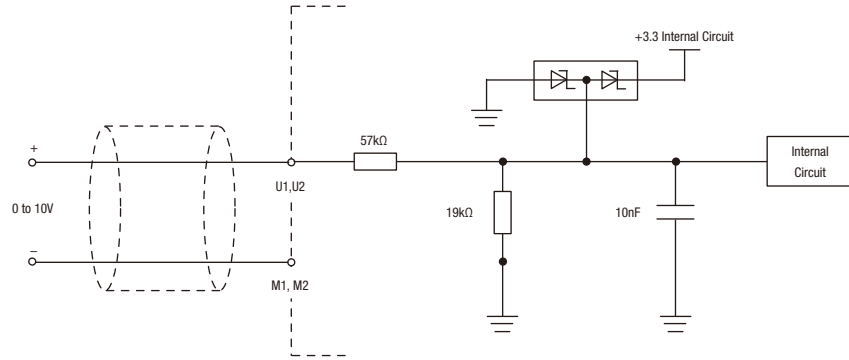

Condition 2:  $R4 (\Omega) \leq \frac{\text{Sensor power voltage (V)}}{\text{Maximum sensor load current (A)}}$

The voltage drop across the load (R4) must be less than 40V while the sensor is turned off.

Condition 3:  $P_{R4} (W) \leq \frac{(\text{Sensor power voltage (V)})^2}{R4 \text{ resistance} (\Omega)} \times 3$  (3: recommended allowance)

**Analog Voltage Input**

FL1F-J2B2

Use a twisted pair cable, and keep the cable as short as possible.

**Analog Current Input**

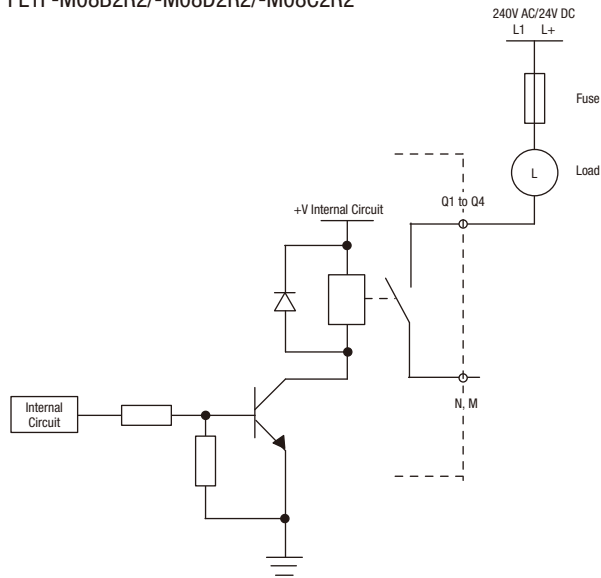

FL1F-J2B2

**Output Internal Circuits**

**Relay Output**

FL1F-H12RCE/-B12RCE/-H12RCA/-B12RCA/-H12RCC/-B12RCC  
FL1F-M08B2R2/-M08D2R2/-M08C2R2

**Analog Voltage Output**

FL1F-K2BM2  
(0-10V DC)

**Analog Current Output**

(0-20, 4-20 mA)

**DC Output (Transistor Source Output)**

FL1F-H12SCD  
FL1F-M08B1S2

When connecting to a DC input type PLC, use a negative common sink input type.

Instructions

Module Expansion

Base Module connects up to 12 Expansion I/O Modules and maximum 60 I/Os can be used according to the combinations shown below.

1. For the terminal arrangement and wiring of the module, please be sure to read FL1F user’s manual.
2. Before connecting and disconnecting modules, turn power off.
3. A maximum of 24 digital inputs, 8 analog inputs, 20 digital outputs, 8 analog outputs can be used by using a combination of a Base Module and Expansion I/O Modules.
4. When using modules of the same power voltage, supply power to the Base Module and Expansion I/O Modules using one power supply. When supplying power to the modules using different power supplies, supply power to the Base Module and Expansion I/O Module at the same time. Or, supply power to the Expansion I/O Module before the Base Module. Expansion I/O module may not be recognized if power is supplied to the Expansion I/O Module after the Base Module. When power is supplied to the modules from different power supplies, the fast transient burst is 1 kV (IEC61000-4-4).
5. A 100 to 240V AC/DC module cannot be connected to the right side of a 12/24V DC, 24V DC, or 24V AC/DC module.
6. For optimal and high-speed communication performance between Base Module and Expansion I/O Modules, install the input/output modules first, then the analog modules.
7. Approvals are as follows:  
 BV: Bureau Verites (France)  
 DNV GL: (Norway)  
 LR: Lloyd’s Register of Shipping (UK)  
 NK: (Japan)
8. The following are the conditions of marine standards approval.
  - Modules of rated power voltage 12/24V AC/DC: Use at 24V DC
  - Modules of 12/24V DC and 24V DC: Use a surge protection device Part no. 918 402/918 422 made by DEHN+SÖHNE or equivalent.
  - For applications on a bridge or decks, a noise filter Part no. B84113-C-B-30 (made by TDKEPCOS) or equivalent is used (FL1F-RD1 cannot be used on a bridge or deck).
  - Contact IDEC regarding the environment where FL1F can be used.

Wiring

Base Module and Expansion I/O Module

- Connect an IEC60127 approved fuse to the power supply for protection against overload and short circuit.
- Do not connect input wire and communication cable in parallel or near the power line, output line, or motor line. Also make sure that any noise source is not present nearby.

Power-up

- After power-up, FL1F takes a maximum of 1.2 seconds (when using a micro SD card) to RUN mode. During power-up, a timer appears on models with a display. When using the FL1F without display, the red LED flashes, then the green LED flashes when RUN mode starts.
- Time taken to change to RUN mode  
1.2 seconds maximum
